SHARE

LAS VEGAS (KLAS) — A 24-year-old woman died of complications from a septic abortion, and her family has sued Dignity Health – St. Rose Dominican Hospital on Blue Diamond Road, according to a wrongful death lawsuit.

Two Drug Combo

- **Mifepristone**
(**Mifeprex** , **RU-486**)
 - 200 mg orally day 1
 - Blocks progesterone receptors in uterus → fetal death

- **Misoprostol (Cytotec)**
 - 800 mcg buccal 24-48 hours later
 - Induces contractions to expel the baby, placenta and other tissue

The Power of Progesterone

Key actions of progesterone:

- Prepares the lining of the uterus for implantation of the embryo
- Promotes development of the maternal part of the placenta
- Inhibits uterine contractions

Mifepristone Blocks Progesterone

Key actions of mifepristone:

- Destablizes uterus lining
- Starves placenta, limiting nutrient and oxygen to the baby
- Could activate cervix to open, putting pregnancy at risk for loss and the mom at risk for infection

U.S. MIFEPRISTONE TIMELINE

2000

- Rapid approval
- 49 days
- 3 office visits
- Physician only
- Dispensed in HC Facility
- Report all serious adverse events

2016

- 70 days
- 1 office visit
- Any prescriber
- Report only death

2021

- No office visit
- Can be delivered via mail
- 2023 – can be dispensed from local pharmacy

In the last three years, Abortion Pill Rescue Network (APRN) has seen a ten-fold increase in clients **obtaining abortion pill through a website or from a friend.**

Abortion today

Abortion proponents estimate that 73 million lives will be ended by abortion this year worldwide and somewhere between 46 million - 58 million will be chemical.

But do we even know how many lives will be ended?

Medical abortions as a percentage of all abortions in the formal U.S. healthcare system

Guttmacher Abortion Provider Census and Monthly Abortion Provision Study

LOS ANGELES TIMES

Why do women choose abortion drugs?

- Forced or coerced
- Desire to avoid surgical intervention
- Perception it is safer and more natural
- Privacy

Complications/Adverse Events

Most common

- Retained tissue
- Hemorrhage (heavy bleeding)
- Infection
- Transfusion

Other adverse events

- Ongoing pregnancy
- Ectopic pregnancy

Death

WHAT DOES THE DATA SHOW?

- 4x higher complication rate than surgical abortions
- Nearly 1 in 9 women will experience a severe adverse event
- FDA label – 1 in 25 will need an emergency room visit

Taking Back the Truth

It is scientifically indisputable that every human life— including unique DNA and all other building blocks of life — starts at the moment of conception.

Abortion ends the life of a whole, separate, unique, living human.

Every innocent human life—whether born or not—is valuable, precious, and worthy of full protection.

Some women regret taking mifepristone to end a pregnancy and desire a way to rescue their babies.

Reversal is Possible!

A well - established evidence - based natural hormonal therapy exists to reverse the effects of the artificial process of mifepristone abortion.

Statistics show over 8,000 lives saved!

98 countries

Abortion pill reversal (it's just progesterone) gives women a last chance to choose life.

She needs to know when to seek help

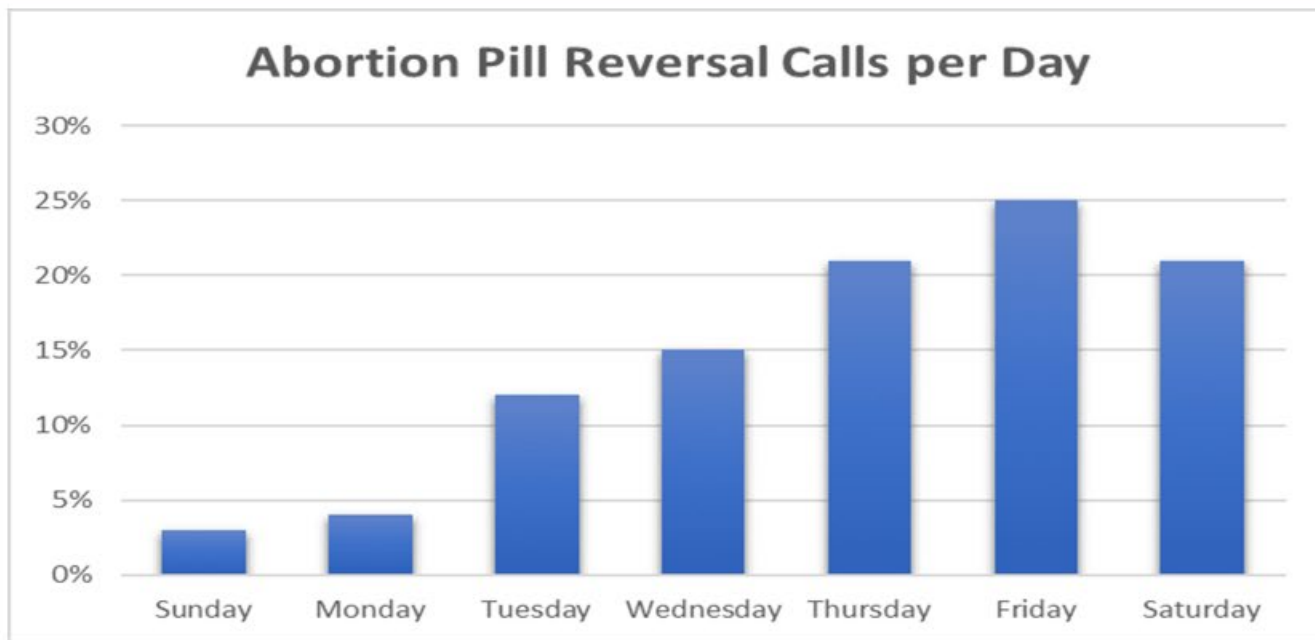

Signs and symptoms that may require medical attention after an abortion:

- Heavy bleeding — two or more pads an hour for two hours
- Severe abdominal or back pain
- Fever lasting more than 24 hours
- Foul- smelling vaginal discharge

Who is the typical APR client?

- All classes, ages, ethnic, religious and economic backgrounds
- Medical professionals, students, some have been trafficked or used
- Tearful, anxious, and afraid
- Challenging circumstances or have influencers who chose abortion for them
- Vast majority are alone and desperately want help to save their children

“I wanted someone to tell me my options not how to start an abortion”

Even those who were unable to stop the abortion drug from ending the life of her child express thankfulness for the assistance they received from the APRN.

From the moment she realized her regret she did everything in her power to protect her child.

Promoting APR on trial in California

- APR is not on trial
- Talking about APR is
- Women can access APR, but they can't know about it
- Reversal is a bad word
- The process is the punishment, unless...
- Dangerous new legal precedent
- What we've learned
- What happens next?

Thank you!
