

Medical Care Following a Chemical Abortion

Brand: Heartbeat Academy
Product Code: 1037

Price: \$59.94

Short Description

The dismissal of in-person dispensing requirements has resulted in increased use of telemedicine and website orders for chemical abortion pills. This has virtually eliminated assessment prior to abortion and made assessment following an abortion even more critical. Many abortion providers are now labeling any sort of routine follow-up care for their patients as “not required” or unnecessary.

This course offers information about what services are needed prior, during and following an abortion and explain how Pregnancy Help Medical Clinics can fill these gaps in medical care and ensure the safety of women following a chemical abortion.

CA BON provider approved by the California Board of Registered Nursing, Provider Number CEP 16061 for 3 contact hours.
