Training for Professionals Reading Limited OB Scans

Brand: Heartbeat Academy
Product Code: 928

Price: $295.00

Short Description

This course is intended for medical professionals gaining competence in reading ultrasound images. It includes a comprehensive review of images that are a result of limited obstetrical ultrasound exams in Pregnancy Centers. With the recommendations of professional societies, the modules have been created to use the technicalities of medicine as well as the uniqueness of Pregnancy Help Medical Clinics, molded together to give the mother the information she needs. Because some Medical Directors may perform hands-on scanning in their clinics at times, some of the information is intended for those actively scanning or for those who are instructing those who are scanning.
