Description

About the Training

A large and growing body of research using good methodology shows that abortion places women at increased risk of mental health problems. This workshop will give attendees/nurses an overview of what current research is showing, from PTSD and substance abuse to sexual dysfunction and relationship problems.

Objectives:

1. Discuss risk factors that place some women at higher risk of developing mental health problems after abortion.
2. Discuss diagnostic criteria for PTSD.
3. Discuss examples of PTSD symptoms in post-abortive nursing clients.
4. Discuss research on PTSD after abortion.
5. Discuss research on problems that clients and their partners may experience after abortion.
6. Discuss basic interventions that can be provided by nurses for post-abortive clients.
7. Discuss referral resources for post-abortive clients.
